### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a communication device, transceiver unit and baseband system. A search of prior art records has failed to teach or suggest, alone or in combination:

A communication device for processing outgoing and in coming packets, comprising:

“a mode line connected to each signal processing unit for switching each signal processing unit between a transmit mode and a receive mode; and

*a control line to which each signal processing unit is connected, the control line communicating flow control information either in the transmit mode to at least one of the preceding signal processing units or in the receive mode to at least one of the following signal processing units”* (pg. 12, lines 10-29) as disclosed in claim 1.

A communication device for processing an outgoing packet, comprising:

“a control line to which each signal processing unit is connected, the control line communicating flow control information to stall at least one of the preceding signal processing units for feedback control of the signal processing units” (pg. 12, lines 10-19) as disclosed in claim 2.

A communication device for processing an incoming packet, comprising:

“a control line to which each signal processing unit is connected, the control line communicating flow control information to stall at least one of the signal processing units following in the signal processing chain for feedforward control of the signal processing units” (pg. 12, lines 20-29) as disclosed in claim 3.

A transceiver unit adapted to communicate with a buffer unit via a bus system, the transceiver unit comprising:

“a mode line connected to each processing unit for switching each processing unit between a transmit mode and a receive mode; and

*a control line to which each signal processing unit is connected, the control line communicating flow control information either in the transmit mode to at least one of the preceding signal processing units or in the receive mode to at least one of the following signal processing units”* (pg. 12, lines 10-29) as disclosed in claim 20.

“a control line to which each signal processing unit is connected, the control line communicating flow control information to stall at least one of the preceding signal processing units for feedback control of the signal processing units” (pg. 12, lines 10-19) as disclosed in claim 21.

“a control line to which each signal processing unit is connected, the control line communicating flow information to stall at least one of the signal processing units following the

signal processing chain for feedforward control of the signal processing units” (pg. 12, lines 20-29) as disclosed in claim 22.

Baseband system comprising; a communication device including

“a control line to which each signal unit is connected, the control line communicating flow control information either in the transmit mode to at least one of the preceding signal processing units or in the receive mode to at least one of the following signal processing units” (pg. 12, lines 10-29) as disclosed in claim 28.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
